

International Curriculum Alignment – Number Detectives: Subitising

Australia Code	Australian Curriculum	United States (CCSS-M)	United Kingdom (England National Curriculum)	Canada (Ontario Mathematics)
AC9MFN02	Recognise and name the number of objects within a collection up to 5 using subitising.	K.CC.B.4, K.CC.B.5 – Understand the relationship between numbers and quantities; count to answer “how many?” K.OA.A.3 – Decompose numbers less than or equal to 10 into pairs (supports subitising).	Reception – Number (Early Learning Goals): Automatically recall number bonds and recognise quantities without counting (subitising to 5).	Kindergarten – Number Sense and Numeration: Recognise and compare quantities to 10 and use subitising to identify small collections without counting.
AC9MFN02_E1	Recognising how many objects are in a collection or on a card with a quick look and saying the associated number without counting.	K.CC.B.4, K.CC.B.5 – Understand cardinality and quickly identify quantities in a set.	Reception – Number: Subitise (recognise quantities without counting) up to at least 5.	Kindergarten – Number Sense: Recognise quantities to 5 and identify numbers represented in different ways.
AC9MFN02_E2	Playing card games involving recognising numbers represented in different ways and using subitising to compare collections.	K.CC.C.6, K.CC.C.7 – Compare two numbers between 1 and 10; identify whether one quantity is greater than, less than, or equal to another.	Reception – Numerical Patterns: Compare quantities and recognise when one quantity is greater than, less than or the same as another.	Kindergarten – Number Sense: Compare sets, recognise quantities in different arrangements and determine which has more or fewer.
AC9MFN03	Quantify and compare collections to at least 20 using counting and explain or demonstrate reasoning.	K.CC.A.1, K.CC.A.3, K.CC.B.4, K.CC.C.6 – Count to 100, represent numbers to 20, understand quantity, and compare numbers.	Reception & Year 1 – Number: Count reliably to 20 and beyond, compare quantities and explain reasoning using mathematical language.	Grade 1 – Number: Count, represent and compare quantities to at least 20 and explain strategies used for counting and comparison.
