

TEACHER & PARENT GUIDE

Learning Focus:

Goal: Read and instantly recognize tally mark groupings up to 10.

Skill Development: Grouping foundational items by 5s, skip counting, and data recognition.

How to Guide the Learner:

Break the Counting Habit: Show the child a closed bundle of tallies. Explain that when they see four standing lines with a slash across them, they don't need to count them one-by-one—that **group is always 5**. **Count On from Five:** Help them say “5...” out loud when pointing to the bundle, and then count on for the extra loose sticks (e.g., “5... 6, 7”).

Name: _____

Date: _____

Grade: Early Years /
K-1 _____

Topic: Tally Mark Matching _____

Part 1: Fast Tally Match!

Look at the tally markings. Find the total number of lines, then use a pencil to draw a line connecting them to the correct number box!
