

TEACHER & PARENT GUIDE

Learning Focus:

Goal: Quantify collections up to 20 using structured arrangements (Ten-Frames). Skill Development: Visualizing numbers, understanding base-10 foundations, and building place value awareness.

How to Guide the Learner:

Look for the “10”: Point to the first ten-frame. Ask the child, *“Is this frame completely full?”* Help them recognize that a full frame always **equals 10** so they don’t need to count those dots one by one. **Count On:** Once they establish the first box is 10, have them point to the second box and count on: *“10... 11, 12, 13, 14!”*

Date: _____

Grade: Early Years /
K-1 _____Topic:
Ten-Frames up to 20 _____**Part 1: Ten-Frame Counting!** 🌟

Look at the frames. One full frame equals 10! Count on to find the total number and write it in the circle.
