

AC9M3A03 • Year 3 Mathematics

Multiplication Facts for 3, 4, 5 and 10

Facts for 3, 4, 5 and 10 can be built from patterns, arrays and known facts. Each multiplication fact connects to related division facts.

We are learning to...

recall and demonstrate proficiency with multiplication facts for 3, 4, 5 and 10;
extend and apply facts to develop the related division facts

Build pattern

Recall fact

Use relationship

Divide

Check

Success criteria

- I can recall 3s facts.
- I can recall 4s facts.
- I can recall 5s and 10s.

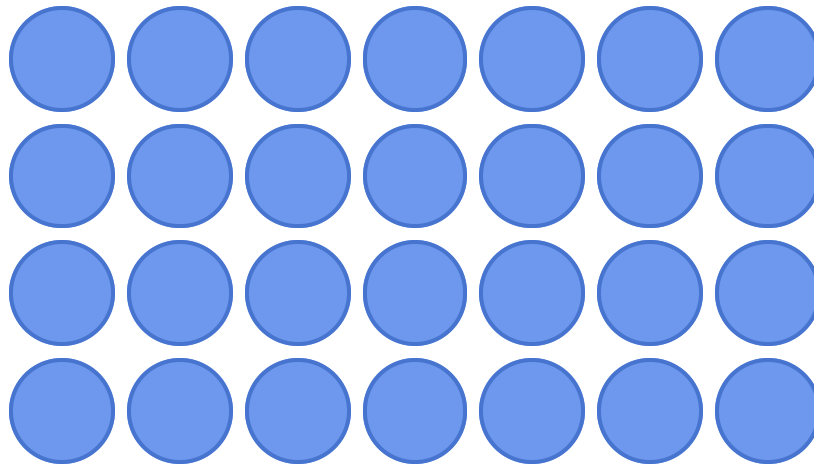

Key vocabulary

multiplication fact

related division fact

proficiency

Connect 4×7 to division

$$4 \times 7 = 28$$

The array shows $28 \div 4 = 7$ and $28 \div 7 = 4$.

Use known facts to derive new ones

Use nearby known facts rather than counting from one.

Show what you know

What is 7×4 ?

Think silently, show your reasoning, then explain it to a partner.

Expected response

$$7 \times 4 = 28.$$

If students are unsure

Use patterns and known facts for recall.
