Dollars, Cents and Money Values

One dollar equals 100 cents. The same money value can be represented with different combinations of coins and notes.

We are learning to...

recognise the relationships between dollars and cents and represent money values in different ways

Read dollars and cents**Convert****Compose amount****Compare representations****Check**

Success criteria

- I can use $\$1 = 100c$.
- I can convert dollars and cents.
- I can represent values.

Key vocabulary

dollar

cent

equivalent value

Represent \$3.75

Total \$3.75

Different combinations can total the same amount.

Convert between dollars and cents

Dollars	Cents
\$1.00	100c
\$2.50	250c
\$4.05	405c

Two digits after the decimal show cents.

Show what you know

How many cents in \$3?

Think silently, show your reasoning, then explain it to a partner.

Expected response

\$3 equals 300 cents.

If students are unsure

Cents are parts of one dollar.
