

Topic: Scientific Investigation

Teacher/Parents instruction:

[DO - NOT -PRINT-THIS- PAGE]

- Introduce the four science steps—**observe, predict, explore, and record**—using a simple hands-on investigation.
- Encourage students to ask questions, make a prediction, test their ideas, and record what happened by drawing, colouring, or ticking their results.
- Celebrate curiosity and remind students that every investigation helps us learn something new.

Curriculum code:

Country	Curriculum Code	Curriculum Alignment
Australia	AC9SFS01	Observe, ask questions, make simple predictions, and share observations from investigations.
United States (NGSS)	K-2-ETS1-1	Ask questions, make observations, and gather information during simple investigations.
United Kingdom	Year 1 – Working Scientifically	Ask simple questions, observe closely, perform simple tests, and record observations.
India (NCF 2023 / NEP 2020)	Foundational Stage – Scientific Inquiry	Observe, predict, explore, and record findings through simple hands-on investigations.

Name: _____ Grade: _____ Date: _____

Topic: *Scientific Investigation*

Students page:

Q1. With your group, choose one object. Look carefully and draw what you see.

Q1. Predict: Will your object **sink or float**? Test it and write about the results: does the object **sink** or **float**?
