Equivalence table for your Foundation Year Biological Sciences

Australia Code	Australian Curriculum	USA (NGSS)	United Kingdom (England)	Canada (Closest Equivalent)
SCISCIFY_1SU	Science Understanding	Kindergarten Life Science – Understanding living things through observation and classification. SEPs: Asking Questions, Planning & Carrying Out Investigations, Analyzing & Interpreting Data.	EYFS / Year 1 Science – Understanding the natural world through observation, discussion and classification.	Ontario Kindergarten – Science & Technology – Exploring the natural environment and living things.
SCISCIFYSU_1	Biological Sciences	K-LS1 – Living organisms, their characteristics and needs.	Year 1 Science – Plants; Animals including Humans.	Ontario Grade 1 – B2: Needs and Characteristics of Living Things.
AC9SFU01	Observe external features of plants and animals and describe ways they can be grouped based on these features.	K-LS1-1 – Use observations to describe patterns of plants and animals. SEPs: Observing, Comparing, Classifying.	Working Scientifically + Plants + Animals including Humans – Observe, compare and classify living things using observable features.	Ontario Grade 1 – B2: Needs and Characteristics of Living Things.
AC9SFU01_E1	Observe fruits and vegetables and identify them as roots, flowers, fruits or leaves.	K-LS1-1 – Observe and identify plant structures and their functions.	Year 1 – Plants – Identify common plants and basic plant parts.	Ontario Grade 1 – Identify plant parts and characteristics.
AC9SFU01_E2	Recognise humans as animals, describe external features of humans and compare them with other animals.	K-LS1-1 – Compare humans with other animals using observable characteristics.	Year 1 – Animals including Humans – Identify body parts and compare humans with other animals.	Ontario Grade 1 – Compare characteristics of humans and other animals.
AC9SFU01_E3	Use magnifying glasses or digital cameras to observe external features of plants (seeds, flowers, fruits, roots) and animals (eyes, body coverings, legs, wings).	Science & Engineering Practices – Planning and Carrying Out Investigations; Using Tools to Make Observations.	Working Scientifically – Observe closely using simple equipment.	Ontario Science & Technology – Use appropriate tools to investigate living things.
AC9SFU01_E4	Sort collections of model animals and explain different grouping strategies.	K-LS1-1 – Classify living things using observable characteristics.	Working Scientifically – Identify, compare and classify living things.	Ontario Grade 1 – Sort living things using observable characteristics.
AC9SFU01_E5	Recognise First Nations Australians' use of observable features to group living things.	Nature of Science – Different cultures contribute to scientific knowledge through careful observation of nature.	Working Scientifically – Recognise that scientific understanding has developed through observations made by many people and cultures (teacher enrichment).	Ontario First Nations, Métis and Inuit Perspectives – Traditional ecological knowledge and observation of living things.
AC9SFU01_E6	Explore how First Nations Australians' observations of external features of living things are represented through traditional dance.	Nature of Science / Crosscutting Concepts – Observation of patterns in nature and cultural connections (enrichment).	Science + Cross-curricular (Art/Dance) – Exploring nature through movement, stories and cultural expression.	Ontario Indigenous Perspectives – Traditional knowledge expressed through stories, dance and observation of nature.
