SCIENCE UNDERSTANDING Revision Slides

1 Humans Are Animals

- Humans are animals.
- We have body parts, senses and needs like other animals.
- We are similar and different from other animals.

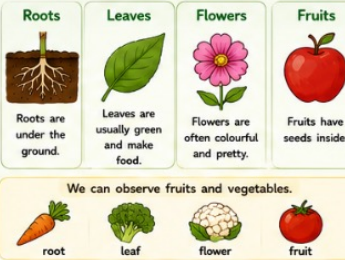

Our body parts

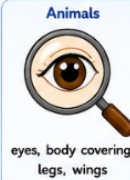

2 Parts of Plants

- Plants have different parts.

3 Observing Closely

- We can use a magnifying glass or a digital camera to observe.
- We can see small features.

4 Sorting and Grouping

- We can sort collections of model animals.
- We can use different ways to group them.

5 First Nations Australians and Grouping

- First Nations Australians carefully observe living things.
- They notice features like size, shape, colour, body covering and where things live.
- They use this knowledge to group and care for Country.

They group things by:

6 Observations in Traditional Dance

- First Nations Australians use what they notice about living things in traditional dance.
- Dances show movements, body parts and stories about animals and nature.

Remember!

- We observe carefully.
- We notice features.

- We group in different ways.

- We learn from First Nations Australians.

- We respect and care for all living things and Country.

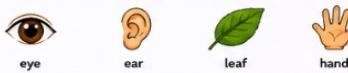

Science Tools We Use

SCIENCE UNDERSTANDING - PRACTICE Let's show what we know!

1 Circle the correct answer.

- a) Which of these is NOT a body part a human?

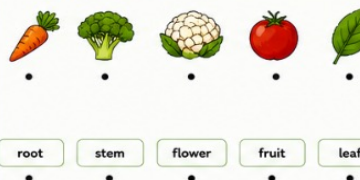

- b) Humans are most similar to other animals because we all
- can fly.
 - have the same body parts.
 - can live in the water.

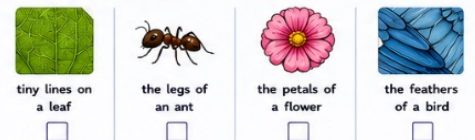

- c) Which animal has wings?

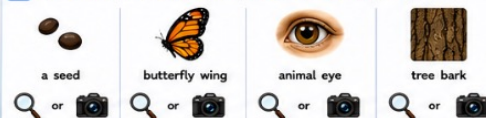

2 Match the fruits or vegetables to the part of the plant.

3 Look at the picture. Tick (✓) the features you could observe using a magnifying glass or a digital camera.

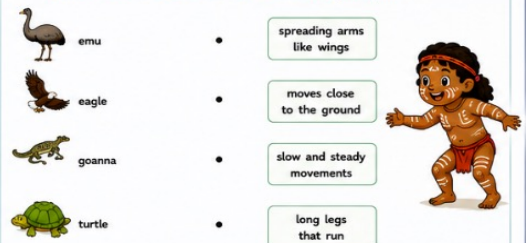

4 What tool would be best to observe these things? Circle.

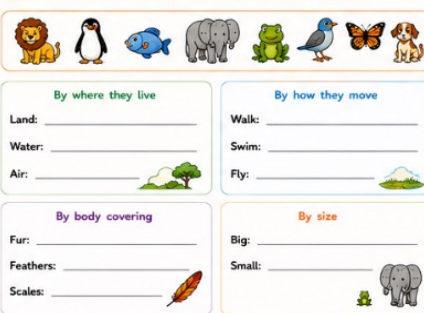

6 Observations in Traditional Dance

Match each animal to the dance movement it might inspire.

4 Sort the animals using the different strategies.

5 First Nations Australians and Grouping

Tick (✓) the best answer.

- a) First Nations Australians observe living things by looking at
- their name.
 - their size, shape, colour, body covering and where they live.
 - how expensive they are.
- b) Why do they group living things?
- To make them all the same.
 - To understand Country and take care of it.
 - To play games only.
- c) Which of these could be a group based on similar features?
- Animals that live in water.
 - Animals that are green.
 - Animals that are big.

They group things by:

BONUS!

Draw a picture of a living thing.
Write one feature you observe about it.

I observe _____

WORD BANK

Use these words to help you.

root leaf flower fruit seed
observe magnifying glass camera group feature
land water air fur feathers scales
