

Equivalence table for your **Foundation Year Chemical Sciences / Materials**

Australia Code	Australia	USA – NGSS	UK – England	Canada – Closest Equivalent
SCISCIFYSU_3	Chemical sciences strand	2-PS1 Matter and Its Interactions	Year 1 Science: Everyday Materials	Ontario Grade 1: Everyday Materials, Objects and Structures / BC Grade 1: Materials
AC9SFU03	Objects can be made of different materials and have observable properties.	2-PS1-1 – Describe and classify materials by observable properties.	Distinguish objects from materials; identify, describe, compare and group everyday materials.	Ontario Grade 1 materials/objects; BC Grade 1: properties of materials determine use.
AC9SFU03_E1	Identify materials objects are made from; recognise some objects use more than one material.	2-PS1-1	Year 1 Everyday Materials: object vs material; identify materials.	Ontario Grade 1: identify materials used in objects.
AC9SFU03_E2	Use tools such as magnifying glasses for detailed observation.	K–2 Science and Engineering Practices: Planning and Carrying Out Investigations; Using tools to observe.	Working Scientifically KS1: observe closely, using simple equipment.	Ontario Grade 1 STEM Skills; BC Grade 1 inquiry skills.
AC9SFU03_E3	Sort/group materials by colour, hardness, texture and flexibility.	2-PS1-1 – Classify materials by observable properties such as colour, texture, hardness and flexibility.	Year 1 Everyday Materials: compare and group materials by simple physical properties.	Ontario Grade 1: sort materials by properties; BC Grade 1: properties of materials.
AC9SFU03_E4	Create a display of materials, name and describe properties.	2-PS1-1 + communication of observations.	Year 1 Everyday Materials + Working Scientifically: record and communicate findings.	Ontario Grade 1 STEM communication; BC Grade 1 communicating observations.
AC9SFU03_E5	Use a digital camera to collect images on a materials scavenger hunt.	K–2 Science and Engineering Practices: obtain, evaluate and communicate information.	Working Scientifically KS1: gather and record data using simple equipment.	Ontario Grade 1 STEM Skills; BC Grade 1 inquiry/recording observations.
AC9SFU03_E6	Suggest why parts of everyday objects use different materials.	2-PS1-2 – Analyze data to determine which materials are best suited for an intended purpose.	Year 2 Science: Uses of Everyday Materials; also supports Year 1 properties.	Ontario Grade 1: explain why materials are chosen for particular purposes; BC Grade 1: properties of materials allow different uses.
AC9SFU03_E7	Explore how First Nations Australians combine materials to make utensils.	K–2-ETS1 Engineering Design + materials for intended purpose.	Design & Technology KS1: select materials for products; Science Year 1/2 materials.	BC Grade 1 has the strongest match: properties and uses of local materials by First Peoples.
