

Materials Around Us – Revision

Let's remember what we have learnt!
We **observe**, **sort**, **describe** and **explore** materials.

What We Have Learnt

1

Different Materials

We name different materials.

wood, metal,
glass, plastic,
fabric

2

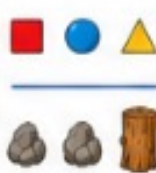

Observe Closely

We use tools like a magnifying glass to see details.

3

Sort and Group

We sort materials by their properties (colour, texture, hardness, etc.).

4

Create a Display

We name materials and describe how they look and feel.

5

Use a Digital Camera

We take pictures of objects on a materials scavenger hunt.

6

Different Parts, Different Materials

We suggest why parts of objects are made from different materials.

7

First Nations Utensils

We learn how First Nations Australians combine materials from nature to make useful utensils.

Materials and Their Properties

Wood

hard

strong

natural

Metal

hard

strong

shiny

Glass

clear

smooth

can break

Plastic

light

flexible

waterproof

Fabric

soft

flexible

warm

Stone

hard

rough

natural

Plant Fibre

strong

natural

comes from plants
