

TEACHER & PARENT GUIDE

SUSTAINABILITY NOTE: CONSIDER REUSING THIS SHEET IN A PLASTIC POCKET WITH A DRY-ERASE MARKER TO SAVE PAPER.

Curriculum Focus:

Code: AC9MFN01 (Australian Curriculum v9.0) Goal: Connecting number names, written digits, and real quantities from 0 to 10.

Guide for Part 1 (Count & Write):

How it works: Children count the emojis in each box and write the final number inside the small circle.

The “Empty Box” (Question 5): This is an intentional question! The curriculum requires students to understand the concept of **zero**. If a child looks at the box and says “there is nothing in here,” praise them and guide them to write the numeral **0** in the circle.

Guide for Part 2 (Count & Match):

How it works: Children count the dinosaurs/animals in the left column and draw a straight pencil line to the correct number box on the right. Tip: Encourage them to cross off or touch each animal with their finger as they count aloud to prevent skipping items.

Helpful Prompts to Say Aloud:

“Let’s point and count together: 1, 2, 3... How many apples did we find?” “Look at Question 5. What’s hiding inside that box? If it’s empty, what number do we write?”

Name: _____

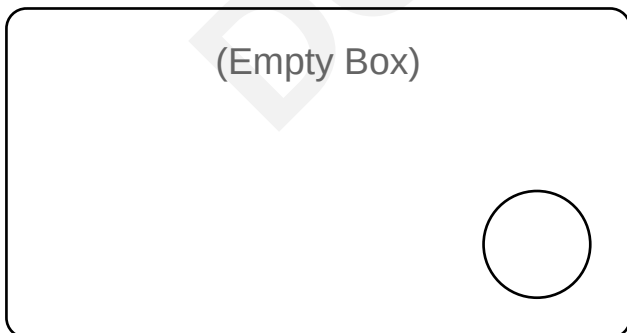

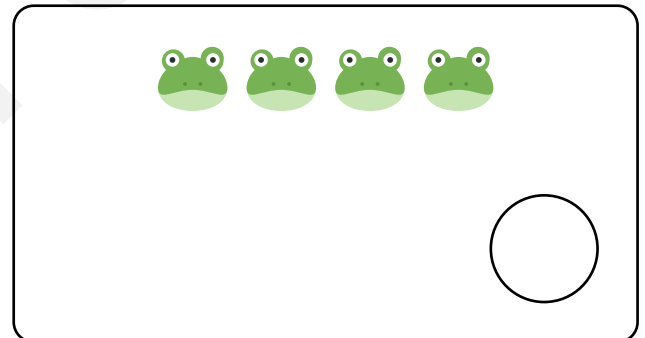

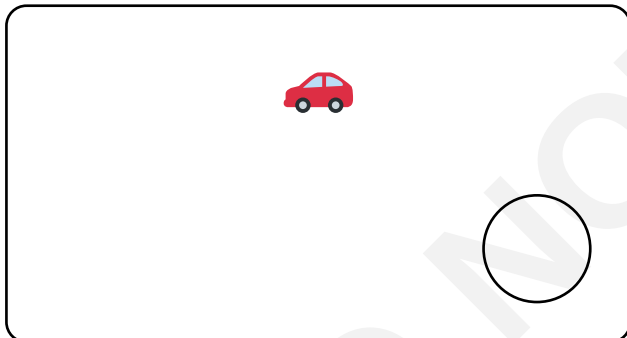

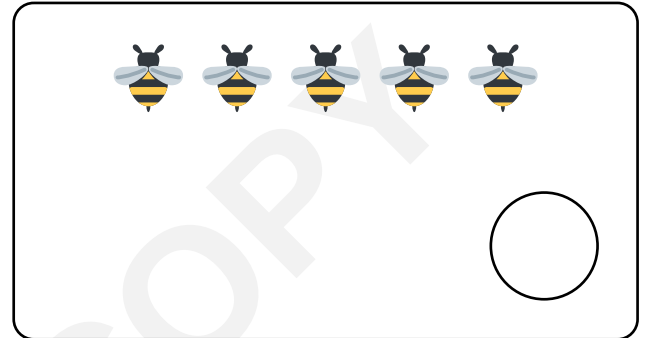

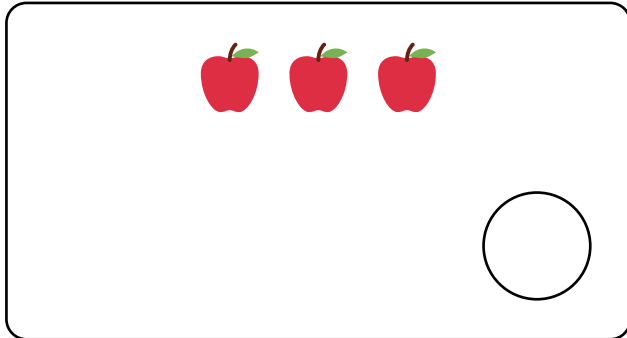

Date: _____

Grade: _____ Topic: _____
