

Identify the date and determine the number of days between events using calendars

Learning intention

- identify the date and determine the number of days between events using calendars.

Teach and model

- identifying and locating specific days or dates on a calendar.
- using calendars to locate specific dates and identify what day it is.
- creating a class calendar to enter specific dates relevant to the class.

Check understanding

- Explain the main idea and give one accurate example.
- Show the idea in a second way: with words, a model, a diagram or symbols.
- Apply the idea to a short unfamiliar situation and justify the result.

Teaching cautions

- Ask the student to explain their choice, not only state an answer.
- Check that key vocabulary is understood in a new example.
- Mix representations so the skill is transferred rather than copied.

Quick lesson sequence

- Connect to prior knowledge and introduce the key vocabulary.
- Model one clear example, then solve a second example together.
- Finish with an independent check and a short student explanation.
