

Sort and order data and information and represent patterns, including with provided tables and visual or physical models

Learning intention

- sort and order data and information and represent patterns, including with provided tables and visual or physical models.

Teach and model

- ordering images of the changing appearance of the moon to show a monthly cycle.
- completing a table to record the number of ways different materials can be changed physically.
- using a graphic organiser to sort images of musical instruments and the actions used to produce their sound.

Check understanding

- Explain the main idea and give one accurate example.
- Show the idea in a second way: with words, a model, a diagram or symbols.
- Apply the idea to a short unfamiliar situation and justify the result.

Teaching cautions

- Ask the student to explain their choice, not only state an answer.
- Check that key vocabulary is understood in a new example.
- Mix representations so the skill is transferred rather than copied.

Quick lesson sequence

- Connect to prior knowledge and introduce the key vocabulary.
- Model one clear example, then solve a second example together.
- Finish with an independent check and a short student explanation.
