

Follow procedures to make and record observations, including making formal measurements using familiar scaled instruments and using digital tools as appropriate

Learning intention

- follow procedures to make and record observations, including making formal measurements using familiar scaled instruments and using digital tools as appropriate.

Teach and model

- exploring how to use equipment such as thermometers or measuring cylinders and making readings with guidance.
- collaboratively designing a table to collect observations in the form of numerical data, written descriptions, drawings or photos.
- identifying and taking on roles in group work, such as setting up the equipment, making observations, recording observations and ensuring safe behaviours.

Check understanding

- Explain the main idea and give one accurate example.
- Show the idea in a second way: with words, a model, a diagram or symbols.
- Apply the idea to a short unfamiliar situation and justify the result.

Teaching cautions

- Ask the student to explain their choice, not only state an answer.
- Check that key vocabulary is understood in a new example.
- Mix representations so the skill is transferred rather than copied.

Quick lesson sequence

- Connect to prior knowledge and introduce the key vocabulary.
- Model one clear example, then solve a second example together.
- Finish with an independent check and a short student explanation.
