

Identify how texts across the curriculum have different language features and are typically organised into characteristic stages depending on purposes

Learning intention

- identify how texts across the curriculum have different language features and are typically organised into characteristic stages depending on purposes.

Teach and model

- recognising that poems have different purposes that influence the organisation into characteristic stages.
- recognising the difference between a text's form such as a poster, email or list and its organisation into stages depending on its social purpose.
- understanding how and why text structure is important in texts such as sequential and causal explanations, and comparative and part-whole information reports.

Check understanding

- Explain the main idea and give one accurate example.
- Show the idea in a second way: with words, a model, a diagram or symbols.
- Apply the idea to a short unfamiliar situation and justify the result.

Teaching cautions

- Ask the student to explain their choice, not only state an answer.
- Check that key vocabulary is understood in a new example.
- Mix representations so the skill is transferred rather than copied.

Quick lesson sequence

- Connect to prior knowledge and introduce the key vocabulary.
- Model one clear example, then solve a second example together.
- Finish with an independent check and a short student explanation.
