

Select, navigate and read texts for a range of purposes, monitoring meaning and evaluating the use of structural features; for example, table of contents, glossary, chapters, headings and subheadings

Learning intention

- select, navigate and read texts for a range of purposes, monitoring meaning and evaluating the use of structural features.

Teach and model

- bringing subject and technical vocabulary and concept knowledge to new reading tasks, selecting.
- using knowledge of text structure to navigate the text to locate specific literal content for a purpose.
- using research skills including locating texts, gathering and organising information, evaluating and using information.

Check understanding

- Explain the main idea and give one accurate example.
- Show the idea in a second way: with words, a model, a diagram or symbols.
- Apply the idea to a short unfamiliar situation and justify the result.

Teaching cautions

- Ask the student to explain their choice, not only state an answer.
- Check that key vocabulary is understood in a new example.
- Mix representations so the skill is transferred rather than copied.

Quick lesson sequence

- Connect to prior knowledge and introduce the key vocabulary.
- Model one clear example, then solve a second example together.
- Finish with an independent check and a short student explanation.
