

Use comprehension strategies such as visualising, predicting, connecting, summarising, monitoring, questioning and inferring to interpret and evaluate ideas in texts

Learning intention

- use comprehension strategies such as visualising, predicting, connecting, summarising, monitoring, questioning and inferring to interpret and evaluate ideas in texts.

Teach and model

- determining and applying criteria for evaluating the content of a website.
- reflecting on content by connecting and comparing information across and between texts.
- analysing the selection and composition of an image in a text and evaluating its effect on the credibility of the story.

Check understanding

- Explain the main idea and give one accurate example.
- Show the idea in a second way: with words, a model, a diagram or symbols.
- Apply the idea to a short unfamiliar situation and justify the result.

Teaching cautions

- Ask the student to explain their choice, not only state an answer.
- Check that key vocabulary is understood in a new example.
- Mix representations so the skill is transferred rather than copied.

Quick lesson sequence

- Connect to prior knowledge and introduce the key vocabulary.
- Model one clear example, then solve a second example together.
- Finish with an independent check and a short student explanation.
