

Plan, create, edit and publish written and multimodal texts, organising, expanding and developing ideas, and selecting text structures, language features, literary devices and multimodal features for purposes and audiences in ways that may be imaginative, reflective, informative, persuasive, analytical and/or critical

Learning intention

- plan, create, edit and publish written and multimodal texts, organising, expanding and developing ideas, and selecting text structures, language features, literary devices and multimodal features for purposes and audiences in ways that may be imaginative, reflective, informative, persuasive, analytical and/or critical.

Teach and model

- developing an argument that has a series of sequenced and linked paragraphs, beginning with a contention.
- creating informative texts that explain and analyse complex phenomena using well-chosen facts and precise language.
- discussing choices of literary devices used in a literary text with a peer, and evaluating the potential effect of each choice on an audience.

Check understanding

- Explain the main idea and give one accurate example.
- Show the idea in a second way: with words, a model, a diagram or symbols.
- Apply the idea to a short unfamiliar situation and justify the result.

Teaching cautions

- Ask the student to explain their choice, not only state an answer.
- Check that key vocabulary is understood in a new example.
- Mix representations so the skill is transferred rather than copied.

Quick lesson sequence

- Connect to prior knowledge and introduce the key vocabulary.
- Model one clear example, then solve a second example together.
- Finish with an independent check and a short student explanation.
