

Making a Pictograph

AC9M1ST02_E1 Creating a pictograph with objects or drawings; discussing the categories, arranging items into them, then reflecting on whether the categories were helpful.

Learning Intention: I can make a pictograph and choose helpful categories.

1. Categories

Choose the groups first.

red, blue, green

one column for each.

2. Arrange

Place one picture each.

one object = one answer

stack them in the column.

3. Reflect

Did the groups help?

were any left over?

would other groups be better?

💡 Model It

Favourite colour pictograph: red has 4, blue has 2, green has 3.
Each block is one child. Red is the tallest column.

Let's Talk

What categories will we use?

How many pictures in each column?

Helpful groups?

Which column is the tallest?

For Teachers & Parents

Pick categories together:

colours, fruits, pets.

Stack one picture per answer:

in equal columns.

Reflect on whether groups helped.
