

Practice: Making a Pictograph

Read the pictograph. Each block stands for one.

Name: _____ Date: _____

 **Worked Example**

Red = 4 blocks, Blue = 2, Green = 3. Each block is one child. Red is tallest, so red is the most popular.

Q1. How many does one block stand for?

Q2. Red has 4 blocks. How many chose red?

Q3. Which colour column is the tallest?

Q4. How many chose blue?

Q5. How many chose red and green together? (4 + 3)

Q6. What must we choose before we start? (the g_____)

Q7. Should the blocks be lined up evenly?
yes / no

Q8. Why do good categories make a pictograph clear?
Explain.
