

Practice: Showing Data in a Picture

Each picture stands for one. Read the display and answer.

Name: _____

Date: _____

Worked Example

Dogs = 3 pictures, Cats = 2, Fish = 4. Fish is the most (4). Fish has $4 - 3 = 1$ more than dogs.

Q1. How many does one picture stand for?

Q2. Dogs has 3 pictures. How many chose dogs?

Q3. Which group has the most: dogs, cats or fish?

Q4. Which group has the fewest?

Q5. How many chose fish and dogs together? ($4 + 3$)

Q6. How many more chose fish than cats? ($4 - 2$)

Q7. Should each picture be the same size?

yes / no

Q8. Why do we line the pictures up in columns?

Explain.
