

Turn Pictures into Tallies

AC9M1ST02_E2 Translating data from a list or pictorial display into a tally chart to make counting easier, then using skip counting by fives to compare categories.

Learning Intention: I can turn a list or picture into a tally chart and count by fives.

1. Read

Look at the pictures or list.
count each group
see how many there are.

2. Tally

Make a mark for each.
groups of five
four lines and one across.

3. Skip Count

Count by fives.
5, 10, 15...
then add the extra marks.

💡 Model It

Seven fish pictures become |||| || in tallies. Count by fives: 5, then 6, 7. The tally makes counting faster.

Let's Talk

How many pictures are there?

How do we tally them?

Count by fives?

Which category has the most tallies?

For Teachers & Parents

Turn a picture graph into tallies:

one mark per picture.

Skip count by fives:

to total each category.

Compare which group is biggest.
