

When a Group Has Zero

AC9M1ST02_E3 Recognising that when there is no data for a category you may use zero or leave it blank; for example, a birthday calendar where no student is born in May.

Learning Intention: I can show zero for a group that has no data.

1. Check Each

Look at every group.
does it have any data?
count what is there.

2. Show Zero

If a group has none,
write 0 or leave it blank
the column stays empty.

3. Read It

Zero still tells us something.
'no one is born in May'
it is a real answer.

💡 Model It

Birthday chart: April has 2, May has 0, June has 3. May's column is empty because no one was born in May.

Let's Talk

Does every group have data?

How do we show a group with none?

Is zero an answer?

What does an empty column tell us?

For Teachers & Parents

Make a birthday or count chart:

one mark per person.

Show empty groups as zero:

or leave the column blank.

Talk about what zero means.
