

Sorting data and representing patterns

sort and order data and information and represent patterns, including with provided tables and visual or physical models.

Learning intention

- sort and order data and information and represent patterns, including with provided tables and visual or physical models.

Teach and model

- ordering images of seasonal changes across the year.
- using graphic organisers to sort data into groups, such as plants and animals.
- using drawings or digital photographs to document changes in weather over a series of days or weeks.

Check understanding

- Explain the main idea and give one accurate example.
- Show the idea in a second way: with words, a model, a diagram or symbols.
- Apply the idea to a short unfamiliar situation and justify the result.

Teaching cautions

- Ask the student to explain their choice, not only state an answer.
- Check that key vocabulary is understood in a new example.
- Mix representations so the skill is transferred rather than copied.

Quick lesson sequence

- Connect to prior knowledge and introduce the key vocabulary.
- Model one clear example, then solve a second example together.
- Finish with an independent check and a short student explanation.
