

Examine how authors adapt and subvert text structures and language features by experimenting with spoken, written, visual and multimodal elements, and their combination

Learning intention

- examine how authors adapt and subvert text structures and language features by experimenting with spoken, written, visual and multimodal elements, and their combination.

Teach and model

- comparing the opening paragraphs of different public texts such as feature articles.
- comparing the use of linear and non-linear narratives in a range of short stories, and determining the purpose and effect of the different structures.

Check understanding

- Explain the main idea and give one accurate example.
- Show the idea in a second way: with words, a model, a diagram or symbols.
- Apply the idea to a short unfamiliar situation and justify the result.

Teaching cautions

- Ask the student to explain their choice, not only state an answer.
- Check that key vocabulary is understood in a new example.
- Mix representations so the skill is transferred rather than copied.

Quick lesson sequence

- Connect to prior knowledge and introduce the key vocabulary.
- Model one clear example, then solve a second example together.
- Finish with an independent check and a short student explanation.
