Measuring with Metric Instruments

Accurate measurement requires a suitable instrument, correct starting point, careful reading of labelled markings and a unit in the answer.

We are learning to...

measure and compare objects using familiar metric units of length, mass and capacity, and instruments with labelled markings

Select instrument**Check zero and
scale****Measure****Record unit****Compare**

Success criteria

- I can choose instruments.
- I can read rulers.
- I can read scales.

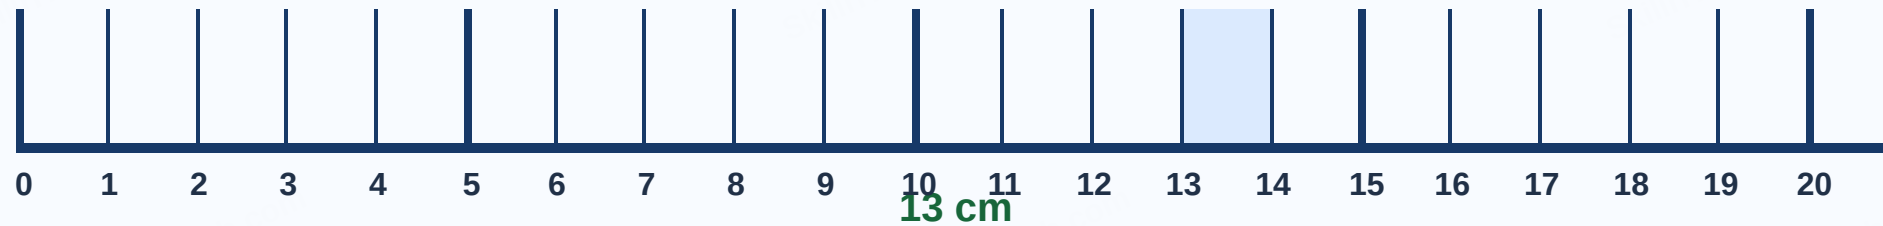

Key vocabulary

scale

interval

capacity

Read a ruler scale

Start at zero and read the marking at the object's endpoint.

Read mass and capacity scales

mass
750 g
interval 100 g

capacity
1200 mL
interval 200 mL

Work out the value of each interval before reading the pointer or level.

Show what you know

Read 13 cm on a ruler.

Think silently, show your reasoning, then explain it to a partner.

Expected response

Begin an object at the ruler's zero mark.

If students are unsure

Use the zero mark.
