

AC9M3ST03 • Year 3 Mathematics

Guided Statistical Investigations

A statistical investigation begins with a question and uses collected data to form evidence-based conclusions while recognising variation.

We are learning to...

conduct guided statistical investigations involving the collection, representation and interpretation of data for categorical and discrete numerical variables with respect to questions of interest

Question

Plan

Collect

Represent

Interpret

Report

Success criteria

- I can ask statistical questions.
- I can plan data collection.
- I can represent data.

Key vocabulary

statistical investigation

question of interest

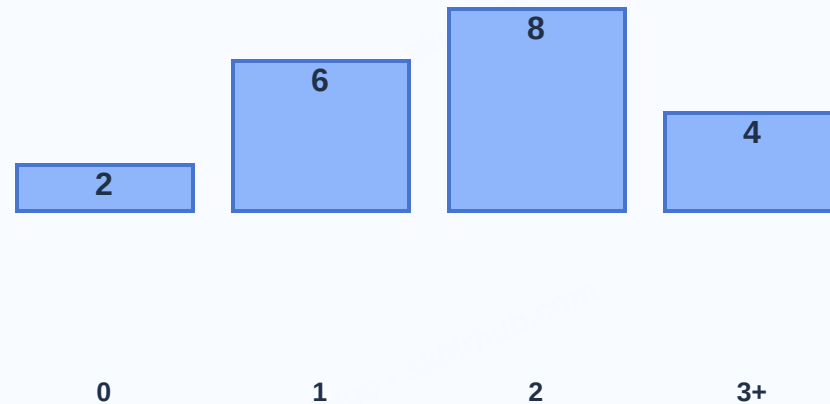

conclusion

Follow the investigation cycle

Each stage should connect back to the original question.

Interpret variation in results

Describe patterns and differences without claiming more than the data shows.

Show what you know

Write a statistical question.

Think silently, show your reasoning, then explain it to a partner.

Expected response

First ask a clear statistical question.

If students are unsure

Collect data that directly answers the question.

statistical investigation

question of interest
