

Physical Sciences Around Us

Welcome, scientists! 
Today we will start **exploring** the exciting world
of **physical science**.

Today we will explore...

1**Pushes
and Pulls**

We will try pushes
and pulls to see
how objects can
move or stop.

2**Moving
Objects**

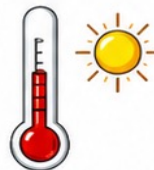

We will discover
many ways
objects can
move.

3**Light and
Dark**

We will explore
sources of light
and what happens
in the dark.

4**Sound
Around Us**

We will listen
and explore
sounds in our
everyday lives.

5**Heat and
Temperature**

We will notice
hot and cold
things and how
heat can change
materials.

6**Materials
Can Change**

We will see how
materials can
change by
melting, freezing,
boiling and
drying.

7**Simple
Machines**

We will explore
tools that make
work easier,
like levers,
wheels and
ramps.

We will be scientists!

**Observe**

We look closely.

**Ask Questions**

We are curious!

**Explore**

We try and test
our ideas.

**Think**

We think about
what we see.

**Share**

We talk about
our discoveries.

Let's be **curious**, **kind** and **safe** scientists!
We will learn so many wonderful things together!
